

FlashLink. NOW 4G Real-Time In-Transit Logger

DeltaTrak's FlashLink NOW 4G Real-Time In-Transit Logger offers cutting-edge technology for monitoring temperature-sensitive products throughout the supply chain. This FlashLink Real-Time Logger offers reliable real-time location and environmental condition tracking, whether you need to monitor location, temperature, humidity, shock, or light exposure. The logger will enable you to stay informed on your shipments 24/7 and is equipped with 4G/5G LTE with a 2G backup option for uninterrupted monitoring.

The FlashLink NOW logger is designed with ease of use in mind. The LCD display allows users to easily toggle between Fahrenheit and Celsius (°F/°C) while confirming activation, cellular connection, battery status, and temperature readings. It offers high-precision location tracking via cellular and Wi-Fi triangulation, with alerts for any unplanned light exposure, ensuring the security of your sensitive goods. With a non-lithium battery that has a one-year shelf life and factory customizable trip durations of 12, 30, 70, 90, or 120 days — this device can meet the requirements for any type of shipment.

DeltaTrak's real-time loggers are essential tools for optimizing cold chain management. Complete trip histories are recorded and stored in a cloud-based platform with an optional PDF report backup with easy access to data including summary information, graphs, and tables. Real-time updates are sent to cloud with details on the location and conditions inside containers and reefer trucks. With these capabilities, you can proactively take action to address supply chain issues and make data-driven decisions to enhance your operations.
