

Introducing UBQ Network – offering fair, safe, secure, and sustainable food chains that seamlessly connects you to buyers, sellers and consumers, whether they’re from your local community or from across the globe.

Real-Time IoT Tracking

Business Intelligence

Get Shipment Clarity at a Glance.

Review the lane, the carrier, the port, or the DC for REAL accountability. Get trusted data and extend Shelf-Life, reduce OTIF Claims and Rejections. Know exactly who is responsible for each segment and actions required to keep operations on track, always.

UBQ Network Partners include:

Shelf Life Prediction

Sell buy dates can not be trusted. UBQ Freshness predicts the true remaining shelf-life with USDA respiration curves and machine learning —temperature, humidity, and time in transit. Reroute, prioritize, and run First Expired First Out (FEFO) strategies for delivery, merchandizing and rotation with confidence. Result: more sell-through, less markdown, and a solid reduction in food waste and food miles.

Carbon Emission Reporting

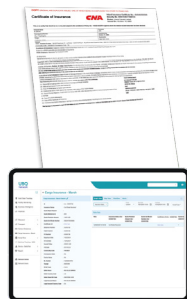

ESG compliance does not need more spreadsheets. UBQ Carbon produces shipment-level Scope 3 footprints automatically. Shipments are converted to distance with DEFRA factors applied to create trusted carbon accounting with no extra work for the logistics team. Lower ESG audit risk and win Receiver RFPs with trusted numbers—no weekend fire drills.

Delay and Cargo Insurance

UBQ Risk helps mitigate and transfer your risks. The world’s leading broker and risk advisor, Marsh provides delay insurance that protects against disruptions lasting 5, 10, 15 days or more. Marsh cargo cover provides all risk insurance for catastrophic loss, theft, and physical damage with quotes created in 30 seconds or less. Claims are automated so payouts are faster and easier.

Price Forecasting and Sourcing

UBQ Market provides pricing signals from climate change, sourcing and purchasing issues, and supply chain disruption so your buyers and sellers lock in better contractual terms when it counts. The goal is simple: protect your margins with tools to help identify new sourcing and buyers.
